Added value

- Selected appropriate Suppliers to tender
- Prepared and issued tender documentation
- Managed the tender to get the most cost effective and appropriate solution
- Provided commercial and technical advice direct to the client throughout
- **Saved 50% against Client's initial budget**

Project Description

Start: October 2007
Complete: November 2007

- IPM was initially appointed to identify short term baggage solutions to cope with the significant growth in throughput to the airport
- One of the key criteria to development and system selection soon became that of minimising space take up to this water locked airport
- This 'miniaturisation' translated into the screening selection need
- IPM was appointed to procure in the most cost effective fashion new screening equipment
- The equipment was to be fully compliant with current DfT approval criteria

End Users

- **LCY Security**

IPM Roles

Procurement Managers
Engineering Advisers
Commercial Advisers
